

Hello, I'm Jose Peiro

From a young age, I've had a passion for games that ignited my creative spirit. I find joy in meticulously planning and organizing tasks to ensure everything runs smoothly. Managing tasks, handling documentation, and taking care of public relations come naturally to me, and I thrive in team-oriented environments. My commitment to learning drives me to tackle new challenges head-on.

Education Experience

Creative Media and Games Technology (CMGT)

Saxion University of Applied Sciences. Enschede, Netherlands.

September, 2021 - Present

My academic journey in CMGT (Creative Media and Game Technologies) has centered on the designer path. This focus has armed me with the ability to facilitate communication between creative teams and project stakeholders, employing project management techniques to boost team productivity. I also bring proficiency in 3D modelling, which enhances my creative capabilities. I am also working toward a minor in environmental design for games, further expanding my skill set and creative horizons.

As a project leader in teams of 6 to 8 members, I effectively used project management tools like Trello, GitHub, and Excel for tracking hours and assets. I also ensured smooth communication through platforms such as Discord, Teams, and Slack. In addition to my leadership role, I actively contributed to the project by creating essential project documents like the Game Design Document (GDD), Lean Canvas, game mechanics, MoSCoW prioritization, and a one-pager for clients. I played a vital part in defining user stories and crafting a thorough playtest form for valuable feedback. Moreover, I applied my 3D modeling skills to create assets for the game environment, adding a creative touch to our project's success.
